

SHOWER CONVERSIONS

Construction
of Illinois, Inc.

Here at J&J Construction, we specialize in transforming bathrooms into well-designed spaces that bring luxury to daily life and work efficiently with your lifestyle.

Converting an existing bathtub/shower combination to a shower can bring light into your interiors, allow you to add the type of customized and luxurious touches you want, and let you experience a spa-like atmosphere.

In this guide, we'll introduce you to the basics of our remodeling process, share some of our previous work, and talk about the types of upgrades that you can expect from your own renovation project.

Once you've read through our guide, we invite you to get in touch and ask questions. Our bathrooms are meant to be enjoyed long into the future, because we care about your satisfaction. You'll see this in each part of our process, start to finish.

Before we even begin work, our staff designer will show you previews of potential layouts. Once you make your selections, you'll be able to view 3D layouts of your new space.

Our commitment to quality and honest, accurate quotes will give you a project price that avoids guessing games and surprise expenses. We're always happy to help you plan for your renovation.

WELL-DESIGNED LUXURY

At J&J Construction, we're your partners in the remodeling process - helping you with the selection of details such as:

- Customized features like heated floors, shower sprays, and bench seats.
- Smart ways to brighten your space with glass shower enclosures, new lighting, and more.
- Types of wall tile, flooring, and fixtures.
- Opening up space by removing or bumping out walls.
- New custom cabinets that fit the room's new look and function

No matter the specifics of your project, our team of remodeling professionals has the expertise necessary to bring your unique vision to life. Our S.U.C.C.E.S.S. Process: a defined system of checklists and quality control measures, ensures we deliver exceptional craftsmanship each and every time. In addition, we cover our work with our five-year “No-Strings” labor warranty. Few home remodelers in the industry offer this level of protection for the investment.

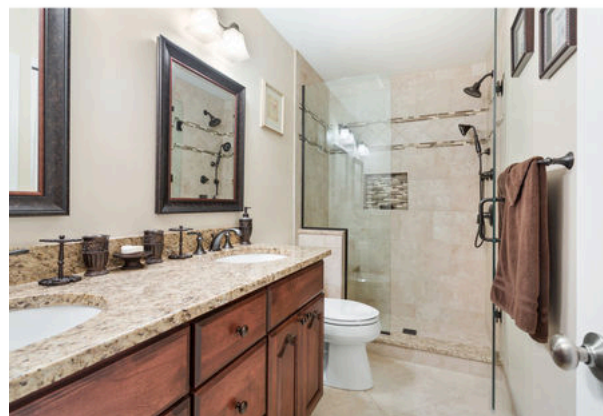

FINE TOUCHES

From simple additions that add updated style to your space, to bold new looks, a shower conversion has endless possibilities. Our team will talk to you about tile choices, accessory finishes, and more as we create the perfect design. Your new shower can harmonize effortlessly with the rest of your home, or J&J Construction will help you choose a whole new look. Our designers know that even small details such as mosaic tile accents, granite or quartz shower niche shelves and seats, and a mix of textures are important in this environment.

A WHOLE NEW LOOK

Once you've decided to change your existing tub or shower combination for a luxurious new walk-in shower, you have the ability to transform the look of your bathroom. Glass walls open up the space, letting light flow and allowing new shower tiles to add a welcome accent. You can change color schemes and complement new or existing features with exciting options in tiles, trims, and fixtures. Many homeowners opt to upgrade their bathroom cabinets at the same time as their shower conversion. Coordinating counters, wood colors and finishes, and hardware creates a finished and stylish new look while adding storage and organization to the room.

TIME FOR LUXURY

Bathrooms should be a place to retreat to and relax. You can rely on our design team to help you select the best features that will make your new shower a favorite part of your day.

Popular items such as heated floors, wall niches, curbless thresholds, footrests, and benches can be added to your design. Customize your experience with waterfall showerheads, body sprays, towel bars, and safety features that are not only attractive but functional.

Every part of your new shower will not only look fantastic - but also treat you to a spa-like experience in your own home. You deserve the best!
